- **Proficient:** JavaScript, React, Redux, React Native, Ruby on Rails, NoSQL, PostgreSQL, SQLite3, HTML5, CSS3, RESTful APIs, JSON API, Git
- **Exposure:** Python, Node.js, jQuery

>PROFESSIONAL EXPERIENCE
UPS | Mobile Developer | San Jose, CA   Oct 2018 - Present
- Created e-commerce mobile app using react-native with a Ruby on Rails backend.
- Used Stripe Checkout to be able check out customers using React Native and Ruby on Rails.
- Utilized libraries in React Native and CSS3 to make the application have a unified styling.
- Allow user to be able to import pictures for t-shirt printing or canvas printing with React Native.
- Increased Traffic of Customers by 42% by making the custom t-shirt/canvas easy for the customer.

Kodefox | Mobile Developer | San Jose, CA   December 2019 - Present
https://github.com/sellflow/sellflow
- Helped brainstorm and build Sellflow, an open source project, with a team of 10 engineers.
- Used Azure sprints and assigned work contribution to build at a fast, steady pace.
- Created Lock Screen with React Native and CSS3 to redirect customers to sign in to their profile.
- Built an order validation screen with React Native and CSS3 that is shown after a successful purchase.

Platinum School of Protocol | Web Developer | San Jose, CA   Oct 2018 - Present
https://gsmith77.github.io/weddings-by-design-website/
- Utilized Bootstrap to create a unified styling across the landing page.
- Used GitHub Pages to make the website live.

American Income Life Insurance | Supervising Agent | Houston, TX   Aug 2016 - Feb 2018
- Managed team of 6 Agents; coached Agents to be able to reach standard sales closing ratio of 33% by ensuring their skills matched what is required to close ⅓ of their clients.
- Consistently increased my Manager's weekly total sales by more than 13,000.

>EDUCATION
Construction Engineering, *The University of Alabama*   2015 - 2016

>CERTIFICATIONS
Full Stack Web Developer Certificate, *Flatiron*   Sep 2019

>PROJECT WORK
Shop Zara | Software Engineer | live | github   Nov 2019
E-commerce web application to purchase jeans from Zara.com.
- Developed frontend in JavaScript, React, and Redux to manage state across platform; leveraged localStorage to maintain shopping cart even when page is refreshed.
- Architected JSON API using json-server to provide ecommerce system with 9 core jean products on startup.
- Engineered filter option to sort products by price, waist size, or both from navbar dropdown menu using JavaScript, React, and Redux.
- Created cart component in JavaScript, React, and Redux to handle increasing, decreasing, and removing items as well as checking out.

Food Lover | Software Engineer | live | github   Aug 2019
Scarped Yelp API to gather results for restaurants, reviews, and events across the globe.

- Constructed full stack JavaScript, React, and Redux application with a RESTful Ruby on Rails backend; used PostgreSQL and ActiveRecord to create and migrate Database.
- Styled the React components to have a unified design with JSX (React's Virtual DOM) and CSS3.
- Architected user search feature using input forms attached to Ruby on Rails backend fetch request to the Yelp Fusion API RESTful API.
- Enabled users to create reviews internally on businesses fetched from Yelp's RESTful API using JavaScript, React, and Ruby on Rails.
- Combined Redux and localStorage to create global state that would deliver Yelp API data and current user across the React Lifecycle through various Components.

>ACTIVITIES

Hiking: My current goal is to hike through all of the Redwoods and Muir Woods National Parks!

Working Out: I went from 188lbs to 172lbs from Jan 2nd, 2019 - June 6th 2019. Then up to 188lbs again and going down to 178. Body Building has allowed me to grow my self-confidence as well as my self-value.
